

travel software for the FIT tour operator!

Customer News Release: January, 2014

Introducing New CLICCT Features

Clicct Solutions is committed to continuously improving the solution for Tour Operators and is pleased to announce the latest release of new application suite features that will provide improvements in the functionality and in the user interface for specific business processes.

These are two important new features in this release:-

- **BANK RECONCILIATION**

Improved functionality to improve the bank reconciliation process. The Clicct Solution introduces a new feature to automatically select the month to be reconciled. This eliminates the need to have to select the start and end dates for reconciliation.

- **SUPPLIER CREATION**

A new feature now provides functionality to allow for creating a new Supplier from the Product data. During Product creation the system will enable you to select, if required, to automatically create a new supplier using the data provided in the creation of the Product.

Clicct Solutions is committed to being the modern answer for all FIT tour operators and providing a simple and intuitive suite of business applications that delivers the most extensive and advanced, fully integrated, functionality to manage quotes, reservations, dynamic packaging, customers, product inventory, operations and finance with instant dynamic web-page content management.

If you would like to provide any comments on these new features then you can do this by signing into My Clicct on the Clicct Solutions web site and providing us with your feedback on the new features of the Clicct solution.
